

# The Eden Islander

THE OFFICIAL "EDEN ISLES NEWLETTER"

MAY/JUNE 2010

P. O. BOX 2746, SLIDELL, LA 70459

## GENERAL MEMBERSHIP MEETING

**TUESDAY JUNE 8, 2010**

**SALMEN HIGH SCHOOL  
CAFETERIA**

**MEET AND GREET  
6:00 PM - 7:00 PM**

Our first "DRIVEWAY SOCIAL" will be held Sunday, June 6th from 4:00 to 6:00pm at 113 Carina Circle off of Constellation. Come with your beverage of choice and a small snack to share among neighbors. Snowballs will be served at our first social.

Tables will be provided but please bring your own chair. We will have additional "DRIVEWAY SOCIALS" throughout the summer. Signs will be posted with details. Looking forward to "meeting and greeting" our neighbors.

## *A Message From Our President...* **CINDY FRANATOVICH**

Hello Fellow Neighbors,

I would like to thank everyone who attended our last Homeowners meeting in March. We were able to cover a lot of ground and address many pertinent neighborhood issues. I would like to also thank all of our volunteer board members as well as committee men for their hard work and dedication.

Please give a BIG thank you to Kevin Davis, President of St. Tammany, for his fast response in setting the oil booms to prevent the oil from coming into our beautiful lake and canals. We are in close command with everyone with this issue and will take all necessary precautions to preserve our waterways.

I am very excited about the future of our neighborhood and want our property to continue to grow in value. We must participate by maintaining our property and continuing to abide by the rules we have all agreed upon when we purchased our property.

I took the volunteer position of President because we have a great neighborhood, and I am going to do my best to make it even better. But to accomplish that, I need the help of everyone. It always seems like 10% of the people to 90% of the work in neighborhood associations. I do not want to see that happen here. I realize that we all have very busy schedules, that we are all different individuals, and might have different personal agendas. But I would like to ask all of us to put that aside and realize we are all neighbors and that the good of our neighborhood and families should come first.

Please show your support and feel free to comment on what you would like to see happen. We are all in this together. We must continue to protect our neighborhood and the boundaries of Eden Isles.

Please remember to watch your speed limit in the community which is 20mph and obey all stop signs. School will be out for the summer soon and we have many young children within our community and their safety along with the safety of all residents must be a priority. I have heard numerous complaints about speeding and over sized vehicles parking on the streets and common grounds. We are actively looking into ways to resolve this with the help of the St. Tammany Sheriff's Office.

I am happy to announce that the board approved the next phase of our attractive new street signs. As funds become available, we will continue our project to complete and erect new street signs throughout our neighborhood.

Finally, I have to reiterate our need of prompt dues payment. Our Board cannot continue to support our community without funds. A total of 1190 homes are billed annual EIHOA dues. To date, we have received full payment from 34% of our homeowners. THANK YOU!

In closing, remember "Living in Eden Isles is truly Paradise on a half shell".  
Sincerely, Cindy

## **Be Proactive**

Join the Eighth Coast Guard District's Citizen's Action Network

- Free to Join
- Provide real time info to the CG to support its mission of Maritime Domain Awareness
- Req: View of waterway from home or business, telephone, and a will to participate
- Form ore info: call 800-524-8835 or email [cqcanmembert@cgmail.com](mailto:cqcanmembert@cgmail.com)

As a Board (The EIHOA Board of Directors), we get many phone calls seeking our assistance. We try to handle them the best way we can while complying with State and Parish Governments.

We are now asking for your help with one of the most frequently asked topics, "what do we do about litter, including grass clippings, in the lake and our canals".

If you see someone littering, either out of a car window, onto green space, into the lake (including grass clippings) please call the following number and have the information listed below:

**1-888-LITRBUG 1-888-548-7284**

**State of Louisiana, Department of Environmental Quality (DEQ)**

If you provide them with as much information as possible, a license plate, an address, a work vehicle, lawn service, etc., the DEQ will send the offender a letter. Depending on the offense, DEQ will follow up appropriately within their jurisdiction.

Please remember that litter harms wildlife, plastics can choke birds, harm and maim marine life and does not decompose. Even organic matter, such as leaves, grass clippings and animal waste pollute our waterways. All of the latter materials mentioned decompose and ultimately add unwanted nutrients to the lake.

With everyone participating in this effort to keep our canals and green spaces free of litter, we can accomplish keeping our waterways and subdivision clean.

Thank you for your cooperation with this effort.

Paul S. Titus, Jr.

## IT'S PARTY TIME IN EDEN ISLES!

We are at the peak of crawfish season. The inviting smell of cayenne pepper and other exotic seasonings permeate our atmosphere. Shrimp and crab boils are taking place on boat docks. Friends, family and neighbors are coming together to celebrate the joys of living on our island paradise. It's part of our south Louisiana heritage and a big reason why we moved to this island paradise.

Your association's board has received calls from members asking if crawfish, crab and shrimp shells can be safely discarded into our water ways. The answer is yes! If it came from the sea it can return to the sea without adversely affecting our waterway's environment. We do request that you separate nature's shells from other items such as corn cobs and only return the shells to our waterways and Laissez Les Bon Temps Roulez or **"Let the good times Roll!"**

## A Special Request From John Faust

Residents of Eden Isles and Oak Harbor - Your help is needed in challenging the proposed Schneider Canal Project. This project will trap storm surge within a three sided box raising water levels within our community. Currently the water levels average 6 to 12 feet below our homes allowing flood waters to flow around us and dissipate into the surrounding area. This will not happen if the Schneider Canal Project is constructed as proposed. Instead our properties will be 1 to 9 feet below the new levee systems trapping and forcing the storm surge into more than 2,700 homes and businesses.

To understand how the Schneider Canal Project design increases our flood risk you need to understand how its boundaries will trap the flood waters. The southeastern side of the levee is formed by the Torres levee. This levee is perpendicular to the lake and is between 20' to 22' high. The north side will be a new levee system created by the Schneider canal project. It will stretch from the Torres levee, parallel to the lake following the ring levee of Oak Harbor. It will continue to the elevated embankment of the railroad tracks past Hwy. 11. Current plans are to develop the levee to a height of a one hundred year storm surge. This means the levee could be built between 15' to 20' high. The last leg of the box will be the elevated embankment for the railroad tracks, which extend along the northwestern side of our community. These tracks are developed slightly over 9' high. The open end of this box is between the Torres levee system and the railroad tracks, trapping storm surge within our community and flooding our homes and businesses.

There are many factors to consider when hurricanes push their storm surge into Lake Pontchartrain. The Corps is making major changes to the way storm surges enter and exit the lake. They are currently building flood protection systems to protect Orleans Parish that will not allow surge to enter or exit Lake Pontchartrain through IHNC and GIWW. This is a concern because the Corps has released reports stating just how significant these waterways are in draining storm waters from the lake. In addition, the Corps has stated that the new structure located in the area known as the funnel will only add a small amount of water to our region. If the Corps expects us to believe that their projects will have little or no impact on storm surge why are they increasing the levee heights along the eastern end of the levee where it meets the new structure to a new levee height from 2' to 12' higher than they are currently constructed? It is not logical to believe that the surge will just abruptly end at that location and not continue into Chef Pass and into Lake Pontchartrain.

When you look at the combined impact that all current and proposed storm surge projects will have on our community it becomes obvious that storm surge water must pass through our location, which is the choke point, forcing higher than normal storm surge levels into our homes and businesses. The Schneider Canal Project will increase this adverse flood impact on our community.

The ultimate solution is a storm surge barrier, but until that project becomes a reality we must fight any additional projects that will force additional storm waters into our homes. I believe the Schneider Canal Project can be redesigned to include Eden Isles and Oak Harbor and I want the project to explore alternatives that would include us within this protection plan.

I believe a public meeting to discuss the adverse affects this project will have on our community is necessary, therefore please help by submitting the following request:

I am concerned about the adverse affects the Schneider Canal Project, in Slidell, La. will have on the communities of Eden Isles and Oak Harbor. I request a public information meeting be held; specifically addressing how the Schneider Canal Project will impact the citizens of Eden Isles and Oak Harbor. At the meeting please require the Corps of Engineers provide current reconnaissance reports, surge modeling and feasibility studies that show what affects the Schneider Canal Project will have on our community. In addition, allow residents the opportunity to challenge the Corps position with data of their own.

Make this request to the following:

Congressman Steve Scalise  
21454 Koop Drive  
Suite 1E  
Mandeville, LA 70471  
Phone: (985) 893-9064  
Fax: (985) 893-9707
