

Michael Evans

I have been a resident (unit 430) of Harborview for 4 years and a member of the Harborview Board of Directors for the last two years, during which time the most marked improvements were made to the building in years.

*** Ironwork-- complete replacement of four stairways and all railing, including many underlying pieces which were rusted through due to years of neglect.

*** Garage columns--replaced columns that support the building that also had been neglected and superficially repaired.

*** Swimming pool re-plastered-- plaster was cracking.

***Replaced antiquated incandescent lighting with updated fluorescent lighting resulting in reducing the electrical consumption by half.

***Replaced worn out trash compactor and reworked trash chute.

I look forward to continuing this progress and restore Harborview as a great place to live and an even better facility.
